UPC CODES FOR NEWFOUNDLAND AND LABRADOR VEGETABLES

STANDARDIZED CODING FOR FRESH PRODUCE SOLD BY FIXED WEIGHT/COUNT

This list of standardized UPC numbers for U.S. and Canadian grown produce is intended to identify fresh fruits and vegetables that are sold in retail supermarkets in fixed weight form. The Canadian sections have been developed by the Canadian Produce Marketing Association and are being administered by the Produce Electronic Identification Board (PEIB) as a service to the U.S. and Canadian industry. It can also apply to items sold in a fixed count form where it is feasible to attach a regular UPC (usually on a label, wrapper, or twist tie e.g. a pineapple). Please note that the item numbers on the list can only be used with the manufacturer number 033383. It is meaningless to use these numbers with any other manufacturer number obtained through the Uniform Code Council or the Electronic Commerce Council of Canada.

Generic Produce Manufacturer Numbers Only
